Electron Beam Lithography Systems

Solutions for Innovation

JBX Series

JEOL Ltd.

In order to increase the production efficiency, JEOL offers electron beam lithography systems for a variety of applications.

JEOL has supplied a complete line of systems for 50 years, since the development of its first Electron Beam Lithography (EBL) system in 1967.

Today, JEOL is the world's top supplier of EBL systems. Our customer's applications of the systems range from mask/reticle production for high-end devices and nano-lithography research to ultrafine, direct write exposures of communication devices in their factories.

JEOL will continue pursuing higher writing accuracy, higher throughput and easier operation in advancing the development of advanced EBL systems.
