

JBX-3050MV/S and JBX-3200MVS

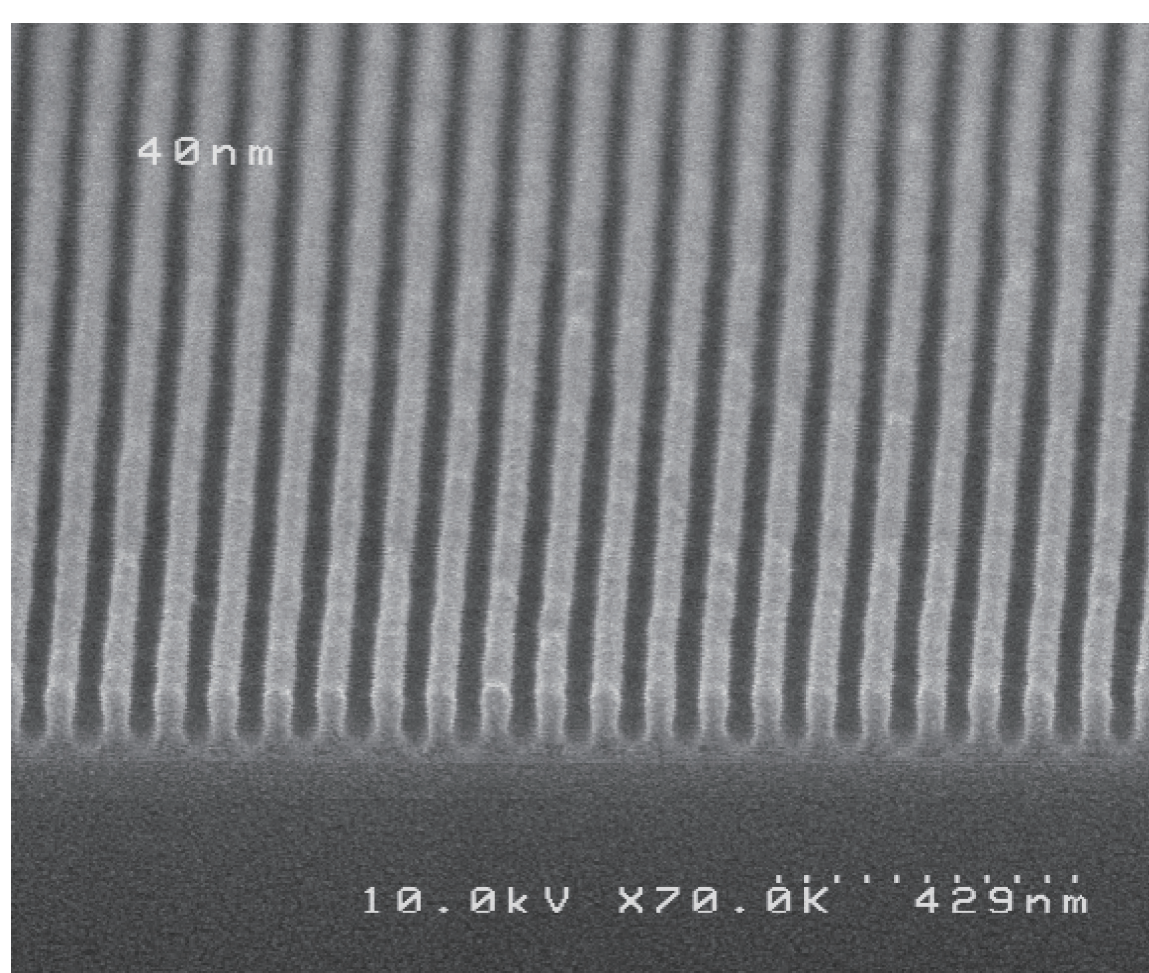

Photomask Production Tool

JBX-3050MV/S and JBX-3200MVS provide electron beam lithography solutions, supporting a wide range of nodes for today's photomask production.

The systems are equipped with a 50kV LaB6 electron source, allowing variable beam shape, coupled with a fast and highly accurate Step-and-Repeat stage.
